

# Planning Assessment Proposal

## Design Number 262

For Frank Walmsley  
30 Chisholm Street, Ainslie ACT 2602  
Completed on 02<sup>nd</sup> of January 2023

Frank,

Thank you for the opportunity to provide this customer project proposal for design 262.

The purpose of this proposal is to provide you with a set of plans that we have developed following consultation with our design and planning team.

We have detailed the specific components included in your final project. Also included in this proposal is the total price which will be applied in our HIA agreement if and when you decide to proceed with construction.

*Please note that this project proposal is valid for 60 days from **02 January 2023***

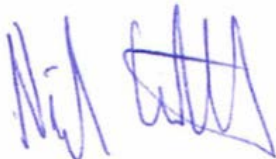

As this is an existing design, we have not accounted for possible additional siteworks, which is the only additional cost that may apply. The additional sitework costs relate to demolition, construction of retaining walls and excessive pre-construction earthworks.

*(Only about 10% of all the project we undertake require additional sitework costs.)*

If you are comfortable with the plans, inclusions, project investment and the process, we can conduct a file site inspection before final HIA agreement, which will determine any additional siteworks.

We look forward to working for you in the future.

Nick Constable | Director and Licensed Builder

Frank Walmsley | Director and Customer Service Manager

## Project Snapshot

**Floor Plans**

**Elevations**

## What's Included in your project

### **The Building**

#### **Floor System**

##### Concrete Slab

- Pour concrete slab as per structural engineer's design.
- Pour concrete footings as per structural engineer's design.
- Install structural steel reinforcement as per structural engineer's design.
- Construct concrete formwork.
- Termite protection system installed to Australian Standard 3660.1 – 2000.
- Hiring of either concrete pumping truck or manual labour in order to deliver concrete to the proposed building area.
- Minimum R1.0 insulation installed to underside of slab to improve thermal heat loss and gain.

#### **Wall Frames**

##### Treated Timber Wall Frames - 2.4m High Ceilings

- Design and install timber wall frame system to Australian Standard 1684.
- Design and install wall bracing and tie downs system to Australian Standard 1684.

#### **Exterior Walls**

##### Painted Timber Composite Weatherboards

- Install Weathertex timber composite weatherboard wall system.
- Apply exterior low sheen acrylic paint system to exterior components.

##### Colorbond Corrugated Sheet

- Install Colorbond sheet wall cladding.
- Your choice from Contemporary Colorbond Colours range.

#### **Roof Frame**

##### Skillion Roof

- Design and install timber roof frame system to Australian Standard 1684.
- Design and install roof bracing and tie downs system to Australian Standard 1684.

#### **Fascia**

## Colorbond

- Install Colorbond metal fascia system.
- Choose from Contemporary Colorbond Colours range.
- Included as standard fascia profile.
- Designed and installed to Australian Standard 3500.3.2.

## Gutters

### Colorbond Gutter

- Install Colorbond metal gutters.
- Choose from Contemporary Colorbond Colours range.
- Included as slotted quad gutter profile.
- Designed and installed to Australian Standard 3500.3.2.

## Downpipes

### PVC Downpipes

- Install painted 90mm round PVC downpipes painted to customers colour preference.
- Can be used with water storage system if desired.
- Designed and installed to Australian Standard 3500.3.2.

## Insulation

### Wall Insulation

- Minimum, R2.0 insulation batts into to exterior walls. This excludes carport and garage walls.
- Install reflective wall breather insulation wrap to exterior walls.
- Manufactured to Australian Standard 4859.1.
- Designed and installed to Building Code Of Australia part 3.12.
- Certificate of compliance attained as required for building approval.

### Roof Insulation

- Minimum R3.5 insulation batts into ceilings. This excludes carport and garage ceilings.
- Manufactured to Australian Standard 4859.1.
- Designed and installed to Building Code Of Australia part 3.12.
- Certificate of compliance attained as required for building approval.

## Roof Coverings

### Colorbond Roof Coverings

- Install Colorbond roof sheeting, fascia, guttering, flashing and accessories.
- Available in Contemporary Colorbond Colours.
- Supplied to Australian Standard 1445.
- Installed and designed to Australian Standard 1562.

## Eaves

### Cement Sheet Eave Linings

- Install cement sheet eaves linings as designed.
- Exterior low sheen acrylic paint system applied to eaves and all eave components, beading and joint strips.

## Windows and Sliding Doors

### Aluminium

- Powder coated aluminium windows and sliding doors.
- Double glazing system.
- Includes sliding, awning and fixed opening windows.
- Flyscreen's included to opening windows and sliding doors.
- Includes colour choice from a range of 9 standard colours.
- Designed and glazed to Australian Standard 2047, 1288 and 2208.
- Wind load performance to Australian Standard 4055.
- You may choose to adjust opening windows to double hung, casement, or other opening windows options, however these are not included in the total price.

## Exterior Doors

### Entry Door

Choice of entry doors 2040mm high.

- Corinthian - Madison, Solidcarve, and Urban ranges.
- Hume - Brunswick, Trend, Newington, and Vaucluse ranges.
- Painted in a colour of your choice.
- Natural timber finishes are not included in the total price.
- Includes Raven weather seal.
- You may choose from a large range of additional entry door options during the inclusions process.

### Choice of entry door locks

- Gainsborough Trilock Traditional or Contemporary options.

- Lockwood Nexion options.

## Interior Fitout

### Interior Doors

- Corinthian or Hume flat interior doors for rooms, wardrobes and cupboards.
- Choice from a range of Gainsborough G series door handles for swinging doors.
- Choice from a range of flush pull handles for cavity sliding doors and wardrobe sliding doors.
- All doors included as 2040mm high.
- Upgrade to mirrored doors for built-in wardrobes and cupboards can be included for \$320 each.

### Trims

#### Choice of 3 skirting and architrave profiles

- Single Bevel. Dimensions: 67mm wide x 18mm thick.
- Half Splayed. Dimensions: 67mm wide x 18mm thick.
- NSW Colonial. Dimensions: 67mm wide x 18mm thick.
- Bull Nose. Dimensions: 67mm wide x 18 mm thick.

### Built-in Wardrobes and Cupboards

- White laminate shelves and hanging rails to built-in wardrobes. Includes top shelf, up to 2 sections of 4 open shelves with hanging rails to remaining area.
- White laminate shelving to built-in linen and storage cupboards. Includes top shelf and 4 open shelves.
- Drawers and alternate shelving layouts are not included in the total price, but can be included as an option during the project inclusions process.
- Please note that free standing cabinets and furniture included in the designs floor plan is not included unless specified in the proposal.

### Wall Linings

- Install 10mm plasterboard wall and ceiling linings.
- Install cement sheet linings to bathrooms and ensuite walls.
- Supply and install joint tape, setting angles and finishing compounds.
- Install 55mm cove cornice to wall and ceiling junction.

### Painting

- Customer's choice of Dulux or Taubmans paint systems.
- Customer's colour choice of interior low sheen acrylic paint system applied to walls.

- Customer's colour choice of interior gloss or semi gloss paint system applied to doors and trims.
- Customer's colour choice of interior flat acrylic paint system applied to ceilings.
- Customer's colour choice of interior wet area acrylic paint system applied to bathroom and ensuite ceilings.
- Up to 2 wall colour choices are included. Feature walls (More than 1 wall colour per room) will be an additional \$300 per feature wall (note; this is not included in the total project price.)

#### Ceiling Access Panel

- White man hole access frame.
- White melamine access panel.
- Dimensions 600mm x 400mm.

#### Kitchen

##### Joinery

- Choice of laminate doors, drawers, panels and kickboards.
- Includes 1 x 4 drawer cabinet, 1 x 3 drawer cabinet with doors to remaining cabinets.
- Includes doors to overhead cabinets
- Overhead cabinets are included as shown by dotted lines on floorplan
- Full height cabinets include up to 4 shelves.
- Base cabinets include 1 shelf.
- Laminate bench tops.
- Choose from a range of cupboard handles.
- Painted or laminate bulkhead around the top of overhead and full height cabinets. Note; not included for designs with a raked ceiling.
- Additional drawers, internal drawers and internal components such as pull out bins and storage solutions may be added; however, the inclusion of these are not included in the total price.

##### Splashback

- Splashback wall tiles to 600mm high above benchtops.
- Tile allowance of \$35m<sup>2</sup>.

##### Kitchen Mixer Tap and Sink

- Choice of kitchen tapware with an allowance of \$150.
- Choice of kitchen sink with an allowance of \$200.

#### Appliances

## Oven

- Choice of oven with an allowance of \$600.
- Included as an electric or gas oven.
- Inclusion of a gas oven will require gas service connection.
- Gas is only included in the total price when a continuous flow gas hot water system included in the project.

## Cooktop

- Choice of cooktop with an allowance of \$500.
- Included as an electric or gas cooktop.
- Inclusion of a gas cooktop will require gas service connection.
- Gas is only included in the total price when a continuous flow gas hot water system included in the project.

## Rangehood

- Choice of rangehood with an allowance of \$250.

## Dishwasher

- Choice of dishwasher with an allowance of \$600.

## Flooring

### Bedrooms

Choose from a wide range of carpet floor coverings to bedrooms

- Carpet with a supply and install allowance of \$50m. (note: we provide this allowance in the total price. If you wish to upgrade with the below options you may, but this will attract an additional investment).

Suggested floor upgrades to bedrooms may include;

- Timber, laminate, vinyl, carpet or bamboo flooring with supply and installation allowance of \$80m<sup>2</sup>.
- Floor tiles with a supply allowance of \$35m<sup>2</sup>.

### Living Areas

Choose from a wide range of living area floor covering options including

- Timber, laminate, vinyl, carpet or bamboo flooring with supply and installation allowance of \$80m<sup>2</sup>.
- Floor tiles with a supply allowance of \$35m<sup>2</sup>. Includes standard stack pattern .You may wish to upgrade to a brick or herringbone pattern; please note, this is not included in the total price, however we can provide a value for this during your inclusions process.
- Includes living, dining, kitchen, entry and hall areas.

## Bathroom

### Floor and Wall Tiling

- Floor tiles with an allowance of \$35m<sup>2</sup>.
- Wall tiles to approximately 2.1m high in shower recess with an allowance of \$35m<sup>2</sup>.
- Wall skirting tile, 1 tile high.
- Splashback wall tile to vanity basin 200mm to 400mm high with an allowance of \$50m<sup>2</sup>.
- Wall tiles to bath, approximately 1.2m high with an allowance of \$35m<sup>2</sup>.
- Chrome floor and shower grates, square or round shape.
- You may wish to upgrade to full height wall tiles and or include a brick or herringbone pattern; please note, this is not included in the total price, however we can provide a value for this during your inclusions process.

### Shower

- Fully framed shower screen 1.8m high to shower recess in chrome or white.
- Choice of shower head/shower rose options with an allowance of \$200.
- Choice of tapware options with an allowance of \$150.
- Sand and cement render base to shower areas to create fall required to shower grate drain.
- Includes 1 shower head per shower recess. You may choose to include additional shower heads and taps in the inclusions process. These can be provided for \$280, plus the value of the shower head and tapware.

### Wet Area Waterproofing

- Install polyurethane wet area membrane to bathroom and applicable wet areas.
- Designed and installed to meet Australian Standard 3740.
- Certificate of compliance as required for building approval.

### Toilets

- Choice of toilet suite options with an allowance of \$400.
- Separate toilets not located in a bathroom have a toilet roll holder allowance of \$50.
- You may select to upgrade to in-wall cistern. (note; is not included in your final total price.)
- Includes all toilets in the design as detailed on the floor plan.

### Hand Basin

- Choice of vanity basin with an allowance of \$400.
- Mirror above vanity basin and splashback. Matches the width of the vanity chosen.
- Choice of vanity basin tap/mixer options with an allowance of \$150.
- Includes 1 basin and tap per vanity hand basin. You may choose to include additional basins and tapware for \$845 per additional basin and tap, plus the value of the basin and tapware.

### Bathroom Accessories

- Choice of bathroom accessory options with an allowance of \$200 per bathroom or ensuite.
- Towel rail, toilet roll holder, hand towel hook, grabrails.
- You may select to include heated towel rails, if so these are an additional \$265 each to provide power and additional installation costs. (note; is not included in your final total price.)

### Laundry

#### Tapware and Sink

- Choice of laundry mixer/tap options with an allowance \$150.
- Steel laundry tub and cabinet or sink with an allowance of \$200.

#### Floor and Wall Tiling

- Floor tiles with an allowance of \$35m<sup>2</sup>.
- Splashback wall tiles included 200mm to 400mm high above laundry tub, with skirting tile 1 tile high to perimeter walls, with an allowance of \$35m<sup>2</sup>.
- Chrome floor waste grates, included as round or square shape (if applicable).
- You may wish to install to full height wall tiles (note; is not included in your final total price).

### Joinery

- Choice of laminate doors, panels and kickboards.
- Includes doors to all cabinets.
- Full height cabinets include up to 4 shelves.
- Base cabinets include 1 shelf.
- Laminate bench top.
- Choose from a range of cupboard handles.
- Painted or laminate bulkhead around the top of overhead and full height cabinets. Note; not included for designs with a raked ceiling.
- Additional drawers, internal drawers and internal components such as pull out bins and storage solutions may be added; however, the inclusion of these are not included in the total price.

- Additional draws may be added; however, the inclusion of additional draws are not included in the total price.

## **Window Coverings**

### Curtains and Blinds

(Note; we have provided the most popular window covering options made by previous clients. If you wish to change, we can accommodate. However, the total price may increase or decrease based on your decision.)

- Luxaflex roller blinds with Calypso blackout fabric range.
- Riteway vertical blinds with Elegance fabric range.
- Luxaflex venetian blinds Slimline range.
- Window coverings are included to living area windows and bedroom windows and doors.
- Excludes
  - Sliding doors and folding doors to living areas.
  - Windows to bathrooms, ensuites, laundry and highlight windows (bottom of window is above 1.8m high).
  - Entry door sidelight windows.

## **Mains Power Supply**

### Power Connection to Existing Building

- Supply and install sub-mains power supply from existing electrical switchboard to proposed new building.
- If your property requires an upgrade to the power supply between the existing electrical meter box and electrical supply companies point of attachment to your property, there will be an additional investment, please see "Mandatory works that may be imposed by utility providers"
- If your property requires an upgrade to the existing meter/switch board to provide the required infrastructure needed for the increased circuits in the proposed new building, there will be an additional investment, please see "Mandatory works that may be imposed by utility providers"
- Please note: if existing landscaping and infrastructure must be disturbed in order to dig trenches required for underground services, the repair of this disturbance is not included, unless otherwise detailed.
- Unless stated otherwise, upgrades to existing infrastructure is not included in the total price and may be required due to the current infrastructure not being compliant under the current rules.

### Sub Mains Distribution Board

- Sub mains distribution board containing power circuits for proposed new building.

## **Power Features**

### Interior Power Points

(Note; we have included the quantity of power points that have suited the majority of our previous clients. If you wish to add additional interior power points, we can provide these during the project Inclusions stage while your project is in planning approvals.

- 2 double powerpoints installed in bedrooms and offices.
- 1 double powerpoint installed in kitchen, living, dining, bathrooms, ensuites.
- 1 single power point for washing machine, refrigerator, microwave and dishwasher areas.
- Power point positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Power point positions may be adjusted to ensure compliance with electrical safety standards and structural restrictions during construction.
- Includes 14.

### Smoke Alarms

- Supply and install mains connected smoke alarms to AS 3786.
- Certificate of compliance attained as required for building approval.
- Smoke alarm positions may be chosen by the owner, however the electrical installer may adjust the position and add or remove smoke alarms located on an electrical and services plan.

### Ceiling Exhaust Fans

- Supply and install IXL Eco Ventflow ceiling fan, including 1 way switching to separate toilets and laundries in cupboards.
- Includes in-built draft damper, decreasing heat gain and loss to the roof space.
- Fan and switching positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Fan and switching positions may be adjusted to ensure compliance with electrical safety standards and structural restrictions during construction.

### Certificate of electrical Safety

- Manage certificate of electrical safety with power company and authorities.

## **Lighting**

### Interior Lighting

- Your choice of SAL Wave LED downlights, or interior light fittings with an allowance of \$30 per light point, with options that include surface mounted oyster light fitting, pendant light fittings or wall mounted light fittings.
- You may also choose of alternative downlight to the premium SAL Wave option, with an allowance of \$5 per light point.
- Includes up to 2 x 2 way switching points. If you choose to add additional 2 way switching points, these can be provided for \$110 each.
- Light and switching positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Light and switching positions may be adjusted to ensure compliance with electrical safety standards and structural restrictions during construction.
- Includes 6.

#### Heat, Fan Light Unit

- Supply and install IXL Eco Sensation, heat, fan and light unit to bathrooms and ensuites.
- Includes built-in draft damper, decreasing heat gain and loss to the roof space.
- An alternative exhaust fan and light may be required if roof space is inadequate for an IXL Eco Sensation.
- Appliance and switching positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Appliance and switching positions may be adjusted to ensure compliance with electrical safety standards and structural restrictions during construction.

#### Exterior Lighting

- Your choice of SAL Wave LED downlights or exterior light fittings with an allowance of \$30 per light point.
- You may also choose an alternative downlight to the SAL Wave, with an allowance of \$5 per light point.
- If you choose to add additional 2 way switching points, these can be provided for \$110 each.
- Light and switching positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Includes 1.

#### Exterior Sensor Lights

- Supply and install exterior motion sensor with LED downlight or an alternative exterior sensor light with an allowance of \$100.
- Light and switching positions may be chosen by the owner, and will be located on an electrical and services plan prior to construction.
- Includes 1.

#### Telephone

### New Telephone Points

- Supply and install telephone connection point.
- Service connection to your chosen service provider is managed by the owner.
- Includes 1.

### Communications Cabling

- Supply and install communications cable and conduit to proposed new building.
- Connection with your chosen service provider including, fees and charges are managed by the owner and are not included in the total project price.
- Supply and install conduit, cable and trenching underground to new building within 15m of the existing residence. Additional investment of \$30 per lineal metre for distances further than 15m from existing residence.
- Please note: If existing landscaping and infrastructure must be disturbed in order to dig trenches required for underground services, the repair of this disturbance is not included, unless otherwise stated.

### Television Aerial

- Supply and install digital television aerial and bracket.
- Supply and install 1 standard television point.

### Drainage and Services

#### Drainage

- Supply and installation of sewer and storm water drainage requirements to new building from existing services.
- Submission of work as executed drawings to the plumbing authorities.
- All new work to be completed using uPVC sewer and storm water pipe.
- Final certification from plumbing authorities as required for Certificate of Occupancy.
- Please note: If existing landscaping must be disturbed in order to dig trenches required for underground services, the repair of this disturbance is not included, unless otherwise detailed.

#### Water Service

- Supply and installation of water services connected to new building from existing services.
- Water services to detached buildings will be run underground.
- The price does not include upgrades in size of the existing water line if required.
- Supply and install 1 exterior tap.
- Final certification from plumbing and drainage authorities.

- Please note: If existing landscaping must be disturbed in order to dig trenches required for underground services, the repair of this disturbance is not included, unless otherwise stated.

## **Fixtures and Features**

### Hot Water Service

Choice of hot water service with options including:

- Steibel Eltron 220L electric heat pump hot water service.
- Includes built in heat exchange system.
- Reduces power usage by an average of 70% compared to standard electric hot water systems.
- The builder will claim the relevant rebate for this system and the deduction for this rebate has been included in the total project price.

Or

- Continuous flow gas hot water service.
- Choice of Rinnai or Rheem systems.
- Connection to existing gas infrastructure.
- Excludes upgrade to existing gas service that may be required to supply a continuous flow gas hot water service.
- Average gas service upgrades from previous projects have an average value between \$500 and \$1,200.

## **Reverse Cycle Air Conditioning**

### 5 KW Reverse Cycle Split System Air Conditioning

- Choice of Daikan or Panasonic systems.
- Supply and install 5KW reverse cycle split system air conditioning with remote.
- Supply and install power supply, drainage and isolator.
- Included with a maximum distance of 3m between indoor and outdoor units.

## **Site Works**

### **Safety**

#### Site Fencing

- 1.8m high temporary fencing installed to create safe and secure work area during the construction period.
- Includes up to 50 lineal m of site fencing. 90% of project require 50 lineal m or less.

## Waste Management

- Removal of all building waste and packaging from the site.
- Skip bins will be used when access is possible. If not, vehicles when required will remove loads.

## Deliveries

- Schedule of deliveries.
- Provide manual labour to manage deliveries and store materials appropriately.
- Use of existing storage areas, garages/carports may be required.

## Site Preparation

### Excavation and Earth Works

- Excavations, foundations, footings and underground services are included in material other than rock.
- Manage machinery required to complete the proposed earth works.
- Excavate for underground services.
- Excavate for footings.
- Please note: If existing landscaping needs to be disturbed to dig trenches required for underground services, the repair of this disturbance is not included unless otherwise stated.

## Preparation and Planning

### Approvals

#### Project Plans and Documents

- Develop site-specific plans required for development and or building approval including, Survey Detail Plan, Site Plan, Floor Plans, Elevations and Sections.
- Manage forms and documents required for application of development and or building approval.
- If you choose to make adjustments to the plans, we can help you with this. This will attract associated fees of approximately \$120 per hour inclusive of GST to engage our architects, engineers and planning team. The value to make changes to plans after submission of planning approval will incur additional government related fees.
- In the case changes are required due to requests from planning authorities, entities or any other organisation during the planning process, no additional price will be passed on, and will be covered by the builder.

#### Development Approval Application

- Manage development approval application through to the notice of decision from authorities.
- Assess relevant acts, regulations and codes relating to the application.
- Address relevant criteria relating to the application.
- Upload plans and documents to local authorities.

#### Development Approval Fees and Charges

- Payment development approval fees including cost of building works fees.
- Payment of public notification fees.

#### Building Approval with Development Approval

- Manage private certifier services to complete building approval.
- Private certifier fees and charges.
- Manage plans and documents required to gain building approval.
- Provide required certificates for issue of certificate of occupancy.

#### Building Approval Fees and Charges

- Payment of building and training levy government fees and charges.

#### Structural Engineer

- Complete structural plans and specifications ready to lodge for building approval.
- Perform soil classification on proposed building site.

#### Building Energy Report

- Provide building energy report to comply with current planning requirements and building codes.
- Construction be completed to comply with building energy report.
- Changes to planning to building energy report requirements, effective after this agreement may not be included in the total project price.
- Upgrades to your existing building(s) that are required due to the project being an extension of the existing building(s) are not included, but may be required to meet planning and building code legislation.

#### Survey and Site Setout

- Site survey and set out required to develop plans and mark out the proposed project.
- Site identification certificate required for certificate of occupancy.

#### Insurances and Licensing

#### Public Liability Insurance

- Public liability and contract works insurance.
- Owners are required to inform their insurance company of the work to be undertaken.

#### Home Owners Insurances

- Homeowners warranty insurance.
- Class 10 buildings do not require homeowners warranty insurance in the ACT.

### **Project Additions**

#### **Alfresco**

##### Painted Timber Posts - Alfresco

##### Roofing and support system for Alfresco/Outdoor Entertainment system

- Install painted timber posts.
- Install Colorbond roof sheeting, and accessories.
- Install cement sheet eave linings.
- Apply exterior low sheen acrylic paint system.
- Pour concrete footings as per structural engineer's design.
- Roof coverings supplied to Australian Standard 1445.
- Roof coverings installed and designed to Australian Standard 1562.
- Frames designed and installed to Australian Standard 1684.

#### **Deck**

##### Concrete Deck

- Included to all covered entry, alfresco and pergola roofed areas.
- Choice of grey, terracotta or limestone coloured concrete.
- Pour concrete slab.
- Pour concrete footings.
- Install structural steel reinforcement.
- Construct concrete formwork.
- Includes 9 m<sup>2</sup>.

#### **Interior Fitout**

##### Raked Ceilings

- Wall and roof frames including raked ceilings as detailed in the building design.

- Designed and installed to AS1684.

## Your Total Project Investment

|   |                     |
|---|---------------------|
| Building                                    | \$190,314.49        |
| Connection to Services and Utilities        | \$14,519.07         |
| Government Charges, Planning and Insurances | \$23,832.31         |
| Project Additions                           | \$00.00             |
| Landscaping                                 | \$00.00             |
| <b>Total Investment:</b>                    | <b>\$228,665.87</b> |

## Price adjustment process

In the interest of transparency, we have documented the price adjustment that would be applied if you deferred your project.

The table below is provided as an adjustment guide to the total project price that will be applied if the HIA agreement is deferred to a later date.

This is due to budget for continuing price increases from:

- suppliers
- government and related agencies
- tradespeople and employees

| Period from initial presentation or date of this proposal | Price Adjustment on the initial fixed price proposal. |
|---|---|
| 0-60 days   | No change   |
| 60 – 90 days  | 0.86%   |
| 90-180 days   | 1.72%   |
| 180-270 days  | 2.58%   |
| 270-365 days  | 3.44%   |
| 365 days+   | Project proposal will require reevaluation            |

**\*All guarantees and warranties will apply\***

Once you have entered the HIA agreement the total project value will not be adjusted unless you defer the commencement of the project for a pro-longed period.

Delays caused by the planning application process will not result a price adjustment, unless initiated by the customer wishing to delay the project (this has not occurred in our last 100 projects).

For potential customers planning in advance, we hope this written process provides clarity and certainty regarding your project timing and budgeting.

## Mandatory works that may be imposed by utility providers

The items/components listed below, may need to be undertaken in order to obtain approval from the utility providers including, but not limited to, ActewAGL and ICON Water.

At this stage of the project it is not possible to determine if we will be required to undertake the following works in order to obtain utility providers approval to build.

In many cases utility providers require upgrades to services as a condition of consent for the proposed development. We believe to maintain our principles of transparency that we should disclose to you up front and before we commence working together.

We have itemised potential upgrades or works that may be required.

### Works or upgrades imposed by ActewAGL

**Mandatory upgrade of providers service power cables to your property:** If your property requires an ActewAGL upgrade to the power supply between the existing electrical meter box and electrical supply companies (ActewAGL) point of attachment to your property, there will be an additional investment of between \$1,500 to \$3,000 - capped. **(Less than 20% of projects required to do this).**

**Mandatory upgrade of you existing meter/switch board:** If your property requires an upgrade to the existing meter/switch board to provide the required infrastructure needed for the increased circuits in the proposed new building, there will be an additional investment of between \$500 to \$3,000 - capped. (Less than 40% of our projects required to do this).

**Mandatory requirement to move your service providers' power cables underground:** If your property requires an ActewAGL upgrade for underground power installation, there will be an additional investment of approximately \$3,500 - \$8,500. (Less than 20% of our projects required to do this).

## Your Project Timelines

|                                      |   |
|--------------------------------------|---|
| Planning process with ACT Government | 12-16 weeks                                 |
| Time to build from approval date     | 10-14 weeks                                 |
| Delivery of certificate of occupancy | 3-4 weeks (subject to government processes) |

## How much will it cost to finance this project?

Using the ASIC mortgage calculator tool, we have calculated the cost of an interest only and principal and interest mortgage with a 5% interest rate over 25 years.

<https://www.moneysmart.gov.au/tools-and-resources/calculators-and-apps/interest-only-mortgage-calculator> -if you would to run our own calculations.

In our assessment we have provided a much higher interest rate than is current available in the market and we have factored the most common loan length that is 25 years.

### Interest only loan repayments

Calculating the total investment of the project at \$228,666 and factoring an interest rate of 5% the weekly interest payments would be \$222 per week.

### Principal and interest loan repayments

Calculating the total of the project at \$228,666 and factoring an interest rate 5% the weekly principal and interest repayments would be \$311 per week.

If you require any assistance with your lender in obtaining finance please let us know, or if you require assistance in finding the best lenders for building and property related loans we can also assist.

## Our Guarantees

At Canberra Granny Flat Builders, our guarantee of workmanship goes without saying. Hence, we also took the time to provide you our guarantees of **price, time, quality, and safety**. We believe that these guarantees provide you, the customer, certainty and assurance long after our initial agreement to work together.

### Our price guarantee:

The price written is the price that you pay. Unlike many builders whose business model is built around providing an opening price with the intent of dramatically increasing it with variations and initial project omissions, we aim to be transparent and provide a total, turnkey price up front.

The only time the project price will change from the original HIA agreement, is if the customer requests a substantial project change.

### Our time guarantee:

Canberra Granny Flat Builders will complete your project on time, every time. Once we receive government approvals, we guarantee to finish your project within the timeline outlined in our signed HIA agreement. If we don't meet our time commitment we will pay you \$250 per day, or pay for a 5-star room until the project is complete.

Our time guarantee is subject to:

- Changes to the project – if you alter the project in a way that impacts the timeline.
- Acts of God or unforeseen events – if the weather or an unforeseen event affects the project. If any of these events occur, we will notify you of the expected time delay.
- Access to the site – for example, if a tenant restricts our access to building your investment property.
- This is to be read in conjunction with your HIA Agreement.

### Our communications guarantee:

We know that the cornerstone of a successful project is clear and transparent communication at every stage. When the building starts, you won't be left in the dark regarding the progress.

- Any time we don't meet our commitment, we will take \$500 off the price of the project.
- Any changes made to your project will be in writing.
- Before the first sod is turned and your project begins, you will know exactly what the timeframes are for the completion of each stage. There will be times when things move fast, and there will be the inevitable delays, but you will always know what is going on and why.
- You can ask to meet with us at any stage of the project. As we spend most of our time building and working with clients, we can't always get to our mobile phones. If you call us on 1300 979 658 Monday to Friday between 9am - 5pm, we will take your contact details and the relevant team member will get back to you within 24-48 hours. Our email [info@cgfb.com.au](mailto:info@cgfb.com.au) is checked daily during the week, but not on weekends.

### Our safety guarantee:

Safety of our staff, sub-contractors, customers and the general public is of the highest importance to our business. That's why we will ensure that;

- All our staff, tradesmen and sub-contractors are fully insured and licensed.
- We would not and will not allow any work or business practices that endangers the wellbeing of anyone associated with our projects.
- All work activities will meet and/or exceed the Government Legislation and industry codes of practice (We are members of the HIA and MBA - ACT) as it relates to residential construction in the ACT.
- We build all our customer projects on-site with locally-based and licensed tradesmen, and ensure they are compliant with the applicable ACT laws.
- All components and inclusions are of the highest standard and meet the relevant Australian Standards.

### Our quality guarantee:

At Canberra Granny Flat Builders, it's our mission to create a world class project that increases the value of your property above the investment in that project. To do that we must use the very best materials, inclusions and tradespeople.

We have developed our detailed inclusion list and style guide to provide our customers with choice and range from among the highest quality options. Our detailed written proposals outline exactly what is included in your project.

To ensure that you are totally satisfied with what we create and build for you, you will not be required to pay the final instalment until you have walked through the project with the builder and are entirely satisfied with the end result.

A guide of how project payments work with CGFB:

| STAGE  | PERCENT | TIMEFRAME      |
|--|---------|----------------|
| <b>DEPOSIT</b>   | 5.00%   | 0 - 2 Weeks*   |
| <b>PLANNING APPROVALS SUBMITTED</b>  | 5.00%   | 2 - 8 Weeks*   |
| <b>FLOOR SYSTEM COMPLETE</b><br>Structural floor system is complete with services to floor level.  | 20.00%  | 10 - 14 Weeks* |
| <b>WALL AND ROOF FRAMES COMPLETE</b><br>Wall and roof frames are complete and braced.  | 15.00%  | 14 - 16 Weeks* |
| <b>CLOSE UP COMPLETE</b><br>The building is lockable and watertight. Windows, wall cladding, roof coverings, eaves and external doors are installed. | 15.00%  | 16 - 20 Weeks* |
| <b>FIXINGS COMPLETE</b><br>Interior doors and trims are complete. Excludes joinery cabinets.   | 15.00%  | 20 - 22 Weeks* |
| <b>PAINTING COMPLETE</b><br>Interior and exterior painting is complete.  | 15.00%  | 22 - 24 Weeks* |
| <b>PROJECT COMPLETION</b><br>Project walk through has been conducted and owners have signed off on their satisfaction with the project.              | 10.00%  | 24 - 28 Weeks* |
| <b>TOTAL</b>   | 100.00% | 28 Weeks*      |

\* Example of the key project result and associated % payment and anticipated time-frame.

## Our Dedicated Team

### Planning Manager

Your appointed Planning Approvals Manager will be Maggie Li. The Planning Approvals Manager's role is to manage the planning approval process on behalf of the client.

The planning approval process includes projects that require Development Approval and Building Approval, in line with current planning and development legislation, guidelines, Australian standards and building codes.

Maggie holds the following qualifications: Master of Urban and Regional Planning and Bachelor of Environmental Engineering

### Construction Manager

Your appointed Construction Manager will be Adam Simons. The construction manager's role is to organise the construction phase of your project from day one on site all the way through to the project handover. Your construction manager will work closely with suppliers and contractors; ordering materials, scheduling trades, and organising deliveries.

They will keep you informed by providing and updating a detailed construction schedule, sending out weekly progress letters, and inviting you along to inspection appointments with the building certifier.

Shortly after receiving the stamped plans for your project, the construction manager will organise an on-site Construction Commencement Meeting where the logistics and any potential issues facing the first stages of construction will be discussed.

Following the Construction Commencement Meeting, the construction manager will start work on the construction schedule for your project. From this point onwards they will be there to answer any questions related to the progression of your project. Adam holds a Bachelor of Communications for Wollongong University, is a qualified carpenter, and has 5+ years of experience working on construction projects in the ACT. Adam can be contacted directly at [construction@cgfb.com.au](mailto:construction@cgfb.com.au).

### Inclusions Coordinator

Your appointed Inclusions Coordinator will be Alyssa Rodwell. The Inclusions Coordinator's role is to assist you in selecting and documenting all the components and inclusions that will go into your project. This will be how we manage the flow of your project information between the team and yourself; through regular Inclusions meetings and written communications.

The Inclusions Coordinator will also help you identify ways in which production procedures can be improved and what selections for your project go best together with the ideas that you like. Within 6 weeks of signing the HIA agreement, we will arrange a face to face meeting for you with the Inclusions Coordinator, or a skype meeting for our interstate clients.

The Inclusions Coordinator will act as your dedicated conduit for information about your project's inclusions. Alyssa holds a Bachelor of Arts in Architecture from the University of Canberra. She can be contacted directly at [inclusions@cgb.com.au](mailto:inclusions@cgb.com.au).

### Licensed Builder and Director

Operations Manager and Licenced Builder Nick Constable will oversee your planning, inclusions and construction team. Nick is a fully licenced builder with 20 years of experience in development and building in the ACT.

To keep you up to date during the process you may opt to have face to face meetings with Nick on a weekly basis in either our Civic or Mitchell office. Nick can be contacted on 0407 237 765.
